

Call Button W 12 CB

[w12cb]

Flexibly and OEM small transmitter

W12CB is a four key call button. Named call, bill, service, cancel. The cancel key on the top button is using for cancel all other three key message. You can define the three different call signal by our software with PC. For example, you can named the three key : manager, accountant, receptionist. And the wrist pager w09w or alpha pager w09n will display the new named signal. At the same time, you can change the label of the call button. So comparing to other wireless call button, W12CB is more flexibly.

How to use it

After registering the call button with the receiver, just press the key, the receiver will receive the signal. This call button have the design of power on/power off function. Press the cancel key 6 s, you can turn on the call button, and press another 6 s for turn off the call button
